All across the US, veterans who fought for the protection of our country sustained injuries that altered their lives forever. Many of these veterans are now living their lives unable to ever walk again, and their only means of transportation is by using a standard, yet limiting wheelchair. By using an ordinary wheelchair, these brave war heroes are restricted from many everyday activities. However, there is an alternative to using a standard wheelchair... the Track Chair. This ingenious innovation is an all terrain wheel chair that helps these veterans to carry on their lives in amazing ways. The Track Chair enables them to do activities that they thought were never possible such as going to the beach, hiking, ice fishing, farm work, car maintenance, and much more! Bowl in this exciting event and you will benefit in many ways... not only will you have fun, but you will know that you made a huge impact on the lives of our American heroes. THANK YOU!

Prizes Galore
